## Rieter to Install World's First Complete Air-Jet Spinning System with J 70 Technology

Guangxi Baisheng Textile Co., Ltd. signed an agreement with Rieter to implement the world's first complete spinning process using Rieter's latest air-jet spinning technology J 70. This project will elevate automation levels and reduce conversion costs at Baisheng's operations, setting a new benchmark in air-jet spinning in terms of quality and productivity.

Guangxi Baisheng Textile Co., Ltd. has decided to expand its air-jet spinning capacity with Rieter's J 70 thanks to its outstanding productivity. This move will enable the vertically integrated textile company based in Guangxi, China, to further ensure a steady yarn supply for its knitting operations. Rieter's air-jet spinning machine J 70 offers exceptional production efficiency and features 200 individually automated spinning units that independently manage quality cuts and natural ends down quickly and efficiently. The J 70 also boasts delivery speeds of up to 600 meters per minute and supports up to four lots simultaneously. In addition, Rieter's latest generation yarn clearer identifies weak yarn during production, ensuring top quality.

The excellent performance of the existing Rieter cards, draw frames and winding machines installed at Baisheng Textile combined with the superior after-sales service have created a strong foundation for the successful collaboration with Guangxi Baisheng Textile Co., Ltd.

Yiyu Zhan, Chairman, Guangxi Baisheng Textile Co., Ltd., says: "Together with Rieter, we will set an all-new benchmark in the industry, elevating the quality and productivity of air-jet spinning to unprecedented levels."

Michael Hubensteiner, Country Managing Director Rieter China, says: "We are proud to build the world's first complete air-jet spinning system with our latest J 70 spinning technology in partnership with Baisheng Textile. This cutting-edge spinning system will enable Baisheng Textile to achieve a new level of competitiveness and expand their industry leadership."

### **About Rieter**

Rieter is the world's leading supplier of systems for manufacturing yarn from staple fibers in spinning mills. Based in Winterthur (Switzerland), the company develops and manufactures machinery, systems and components used to convert natural and man-made fibers and their blends into yarns in the most cost-efficient manner. Cutting-edge spinning technology from Rieter contributes to sustainability in the textile value chain by minimizing the use of resources. Rieter has been in business for more than 225 years, has 18 production locations in ten countries and employs a global workforce of around 5 100, about 16% of whom are based in Switzerland. Rieter is listed on the SIX Swiss Exchange under ticker symbol RIEN.

### About Guangxi Baisheng Textile Co., Ltd.

Established in 2018 in Yulin City, Guangxi Province, China, Guangxi Baisheng Textile Co., Ltd. specializes in producing viscose ring-spun and air-jet spun yarn in yarn counts from Ne 16 to 40 in its manufacturing sites in China. In addition to its spinning capabilities, Baisheng excels in twisting, yarn dyeing on packages, flat knitting, and finishing processes. As a fully vertically integrated textile company, Baisheng manages the entire production chain, ensuring high-quality output at every stage.
